

NOTICE

CAISO's Cluster 15 Interconnection Study

CAISO's Cluster 15 Interconnection Study is allowing LSEs to allocate capacity allotments to Commercial Interconnection Projects. PWRPA is electing to consider allocating commercial interest points to Interconnection Customers. The following are PWRPA's consideration factors for awarding points:

- Interconnection project to be located within PGE service territory,
- Project to be renewable, preferably with storage capability, and
- Project to be open for off-takers to purchase power, green attributes, and capacity.

PWRPA's contact information for conducting the points allocation is:

Cori Bradley
Operations Manager
cori@robertson-bryan.com
(916) 405-8923
